

**Setting: SCHOOL**

CHRISTOPHER. Reverend Peters, where is heaven?

REVEREND PETERS. I'm sorry Christopher?

CHRISTOPHER. In our universe whereabouts is it exactly?

REVEREND PETERS. It's not in our universe. It's another kind of place altogether.

CHRISTOPHER. There isn't anything outside our universe Reverend Peters. There isn't another kind of place altogether. Except there might be if you go through a black hole. But a black hole is what is called a Singularity which means it's impossible to find out what is on the other side because the gravity of a black hole is so big that even electro-magnetic waves like light can't get out of it, and electromagnetic waves are how we get information about things which are far away. And if heaven is on the other side of black hole then dead people would have to be fired into space on a rocket to get there and they aren't or people would notice.

*Reverend Peters looks at him for a while before he responds.*

REVEREND PETERS. Well, when I say heaven is outside our universe it's really just a manner of speaking. I suppose what it really means is that they are with God.

CHRISTOPHER. But where is God?

REVEREND PETERS. Christopher, we should talk about this on another day when I have more time.
